DETAILED ACTION

Allowable Subject Matter

Claims 3-6 and 10-13 have been renumbered as 1-8 respectively.

Claims 1-8 are allowed.

The following is an examiner's statement of reasons for allowance:

Kodama et al., US patent application publication 2002/0004925 A1, discloses an error correcting device. Kodama does not teach or fairly suggest the following features, which are recited in each independent claim of the present application:

An error and sync detection device, comprising:

a data rearrangement block;

a parity check block;

a data storage block;

wherein the parity check block includes a first calculation block and a second calculation block;

the first calculation block receives the 8-bit byte data that is output from the data rearrangement block, and performs a calculation therewith before the operation of delaying the data by a predetermined number of clocks, so as to output intermediate byte data to the data storage block, the intermediate byte data representing a result of the calculation; and

the second calculation block receives the intermediate byte data from the data storage block, and performs the calculation therewith before the operation of delaying the data by a predetermined number of clocks, so as to output 8-bit byte data that has

undergone the MPEG sync byte detection operation and the parity-check-based error detection operation as recited in claims 1 and 5.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
